

Ropeway Control Systems

Doppelmayr USA is pleased to present a one day overview to Ropeway Control Systems. The seminar will start with a discussion about ropeway fundamentals and core concepts of a safety control system. We will build on those core concepts as we focus on the Doppelmayr approach to controls. This is targeted to any ropeway owner, operator, or technician who wishes to know more about Doppelmayr control systems.

Outline

- Ropeway Fundamentals / Subsystems
- Safety System Fundamentals
 - System Architecture
 - Safety PLCs
- Doppelmayr Control Systems
 - Safety Circuits
 - Reset and Run Conditions
 - Main Drive Speed and Torque
- Additional Components for Detachable Systems
 - Grip Attaching / Detaching
 - Anti Collision
 - Carrier Spacing
